Introduction

- Lotto Data Manager has been brought to life to assist the user to manage his luck, money, and time in playing the Lotto.
- There are times you cannot pick anymore a number because of frustration. This software will let you choose a number of random number generators for a pick as your bet.
- You can monitor your average spending per game.
- You can see the latest draw result without searching on the internet.
- It can assist you to manually pick your next number by having highlighting the pattern of drawn numbers on your bet versus the drawn result.

Demography

Unfortunately, this has been programed locked on Philippine Lotto Game only as I only know how to play the games within the country.

Idea to Software

When you are into playing the lotto game, you will sometimes wonder if you choose the most appropriate number pick as your bet following your divine ritual number pattern astrology technique. Frustration will follow that none of your chosen number will be drawn.

In your simple analysis, you tend to find a pattern on how a number has been drawn comparing it to the previous result. By formulating your own pattern analysis and comparing it to the historical drawn result, you were always hitting the right number once, twice thrice.

This software will specifically show you the simple pattern of picking up a random number as your bet, and how frequent a certain number has been drawn compare to previous drawn results.

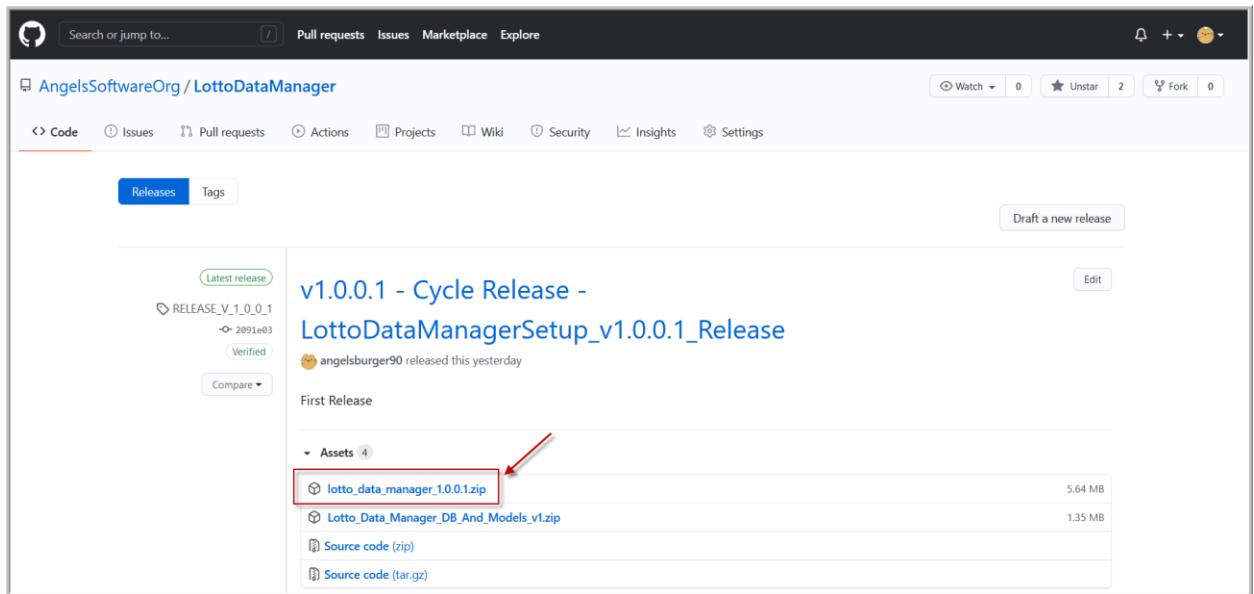

EXPECTATION

- WHAT EVER THE RECOMMENDATION ON THIS SOFTWARE AND ITS GIMMICK TO ENTICE YOU TO PICK UP A GENERATED NUMBERS AS YOUR BET, THAT WILL STILL BE A RANDOM NUMBERS AT BEST.
- DON'T HOPE THAT THIS WILL BE YOUR GATEWAY TO RICHEST.
- AT THE END OF THE DAY, LOTTO GAME IS A FAIR GAME NUMBER!!!
